

Request for Voluntary Respirator Usage

In order to receive approval to use respirators voluntarily as defined by 29 CFR 1910.134 (OSHA’s Respiratory Protection Rule), print this form, complete sections 1-2 (**make sure that you and your supervisor sign it**) and send it to the Respiratory Protection Program Administer at 102 TOMH. The program administrator will then contact you. If you have any questions, contact the program administrator at 2-2943 or via email at kerry_smith@byu.edu.

Section 1 Employee Certification:

I, _____ (print name) do hereby certify that I am voluntarily using a respirator to reduce my exposure to the following contaminant (list name or type of contaminant)

I have been given a copy of 29CFR1910.134 Appendix D regarding the proper respirator use and I have read and understand it.

Sign _____ Date _____

Print Name _____

Section 2 Supervisor Certification:

I approve this voluntary usage of respiratory protection for this employee.

Sign _____ Date _____

Print Name _____

Section 3 BYU Risk Management & Safety Dept. certification:

I have determined that this voluntary use of a respirator will not create a hazard in the workplace and approve this voluntary usage of respiratory protection for this employee. The respirator is a NIOSH approved, filtering facepiece respirator and no further action is required.

Sign _____ Date _____

Print Name _____

Appendix D of OSHA’s Respiratory Protection Rule is on the following page

Appendix D of 29CFR 1910.134

Information for Employees Using Respirators When Not Required Under the Standard

Respirators are an effective method of protection against designated hazards when properly selected and worn. Respirator use is encouraged, even when exposures are below the exposure limit, to provide an additional feel of comfort and protection for workers. However, if a respirator is used improperly or not kept clean, the respirator itself can become a hazard to the worker. Sometimes, workers may wear respirators to avoid exposures to hazards, even if the amount of hazardous substance does not exceed the limits set by OSHA standards. If your employer provides respirators for your voluntary use, or if you provide your own respirator, you need to take certain precautions to be sure that the respirator itself does not present a hazard.

You should do the following:

1. Read and heed all instructions provided by the manufacturer on use, maintenance, cleaning and care, and warnings regarding the respirators limitations.
2. Choose respirators certified for use to protect against the contaminant of concern. NIOSH, the National Institute for Occupational Safety and Health of the U.S. Department of Health and Human Services, certifies respirators. A label or statement of certification should appear on the respirator or respirator packaging. It will tell you what the respirator is designed for and how much it will protect you.
3. Do not wear your respirator into atmospheres containing contaminants for which your respirator is not designed to protect against. For example, a respirator designed to filter dust particles will not protect you against gases, vapors, or very small solid particles of fumes or smoke.
4. Keep track of your respirator so that you do not mistakenly use someone else's respirator.
