

# LOCKOUT TAGOUT TRAINING

## What Would Cosmo Do?

### **Cosmo is trained for lockout tagout** **Annual Training Must Include:**

- Preparatory procedures
- Recognition of hazardous energy source, the magnitude of the available energy; and the methods necessary for isolation and control
- Releasing equipment of machinery from lockout procedures
- Practical applications of LOTO devices
- Review of this program

### **When Re-Training is Required:**

- Annually
- Whenever there is a change in job assignments; change in machines, or process; or change in lockout procedures
- Whenever Authorized Individuals are unfamiliar with lockout procedures
- If department supervisors feel that Authorized Individual is in need of training

### **Record of Authorized Individuals:**

Each department must maintain a record of all Authorized Individuals' training. The documentation needs to include:

- Subject of training;
- Date of training;
- Authorized Individual name; and
- Name of supervisor of RMS personnel providing the training

**Each year, approximately 3,000 workers suffer from lost time injuries due to the unexpected release of hazardous energy**
