

.....

BIOLOGICAL SAFETY

What Would Cosmo Do?

.....

Cosmo has the proper training

Training

Anyone working with biological agents must be trained in the following:

- **Signs and symptoms associated with agent**
- **Normal transmission route**
- **Required PPE**
- **Required vaccinations**
- **Limitations for vulnerable groups**
- **Biological safety and biosafety manual**
- **Specific laboratory procedures**

Monitoring

- **The BSO will inspect each covered laboratory once per year**
- **The IBC will review the inspection for each lab**

Many biological agents are capable of spreading from person to person
