

ASBESTOS HOUSEKEEPING

What Would Cosmo Do?

Cosmo is cautious near asbestos **Employee Duties**

The following housekeeping procedures must be followed:

- Sanding of ACM floor tile is prohibited
- Stripping of finishes shall be conducted using wet methods and low abrasion pads at speeds lower than 300 rpm
- ACM that is visibly dusty or deteriorated shall not be dusted, swept or vacuumed without using a HEPA filter
- Dry buffing can occur only if there is enough finish to prevent ACM contact

Training

BYU will conduct awareness training teaching the basic principles of working safely around asbestos for individuals who may encounter asbestos materials or work around asbestos as part of their job.

Questions?

For further information, contact RMS at 801-422-4468 of Physical Facilities for further assistance. Unless you are certain as to the status of a material, contact one of these groups before disturbing a material. If the material is unknown, RMS will sample it for you.

The quantity of asbestos on campus is dwindling, but it is still found in some materials.
